~~The features of the preamble of claim 1 are known from DE 39 273 85 A1. The DE 39 273 85 A1 welt is for seams on upholstery material comprising a plastic core and a ribbon-shaped mesh fabric folded around the core connected on the internal side with an external decorative liner. The core comprises a weldable plastic. Protruding laterally from the core is a one-piece rod made of the same plastic that protrudes over the mesh fabric and hereby permits welding to the upholstery material.~~
